

Immerse Yourself in Zero Gravity

Shown in inversion therapy position

The Benefits of Zero Gravity

Like the zero gravity astronauts experience in space, the Smart Chair provides a weightless experience to relieve tension, stress and muscle discomfort. With two zero gravity positions the experience promotes overall well-being, reducing your heart rate, lowering blood pressure, soothing stress, and calming both the body and mind for a one of a kind relaxation experience. The steady rhythmic massage soothes fatigued muscles, releases tension and restores a normal, steady heart rate by assisting in the transmission of oxygen-rich blood throughout your entire body.

Specifications

- Upright: 59" x 35.4" x 45.7"
- Reclined: 74" x 35.4" x 36.2"
- Reflexology Rollers: 3 per sole (6 total)
- Air Cell Total: 38
- Motors (total): 9
- Weight: 294 lbs

Your Remote Control for Comfort and Relaxation

- BACK ADJUST:** Use these buttons to choose your desired back rest position.

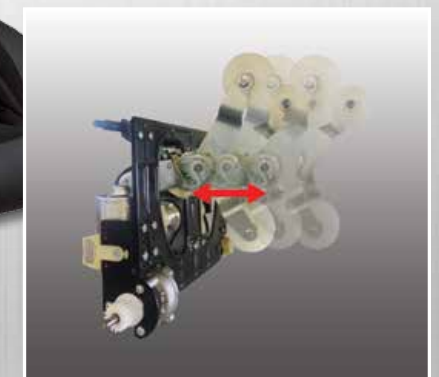

SmartChair X3

Relax, You've Earned It!

When you invest in the massage chair of your dreams, we know you're investing in the lifetime of comfort and quality that it will provide. The Infinity full body massage provides a timeless blend of technology, relaxation, and aesthetics.

The SmartChair X3 is the ultimate in indulgence!

COMPATIBLE WITH

Exclusive New 3D Technology

Control your chair using our exclusive app available for Apple® and Android™

Whole Body Airbag Massage

Head Rest Pillow Airbags

Through gentle swinging motions and pressure points, the airbags inflate and deflate to provide superior comfort and relaxation, relieving tension, neck pain and headaches.

Shoulder Airbags

Airbags below both shoulders offer powerfully refreshing, kneading, rolling and twisting massage motions. Like a professional massage, they provide the highest level of comfort and relaxation to areas with the most tension.

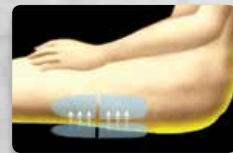

Arm and Wrist Airbags

Airbags along the wrists offer a soothing wave-like motion to promote circulation and refresh your arms.

Lower Waist Airbag

The deep, kneading motion of the 3-layer massage airbags are superior to the motion of human hands to promote circulation, leaving you feeling refreshed and renewed.

Lumbar and Buttock Airbag

The twisting motion of two powerful airbags are like the hands of a talented masseuse, providing you with an invigorating massage that rolls out tension and revives the buttocks and thighs.

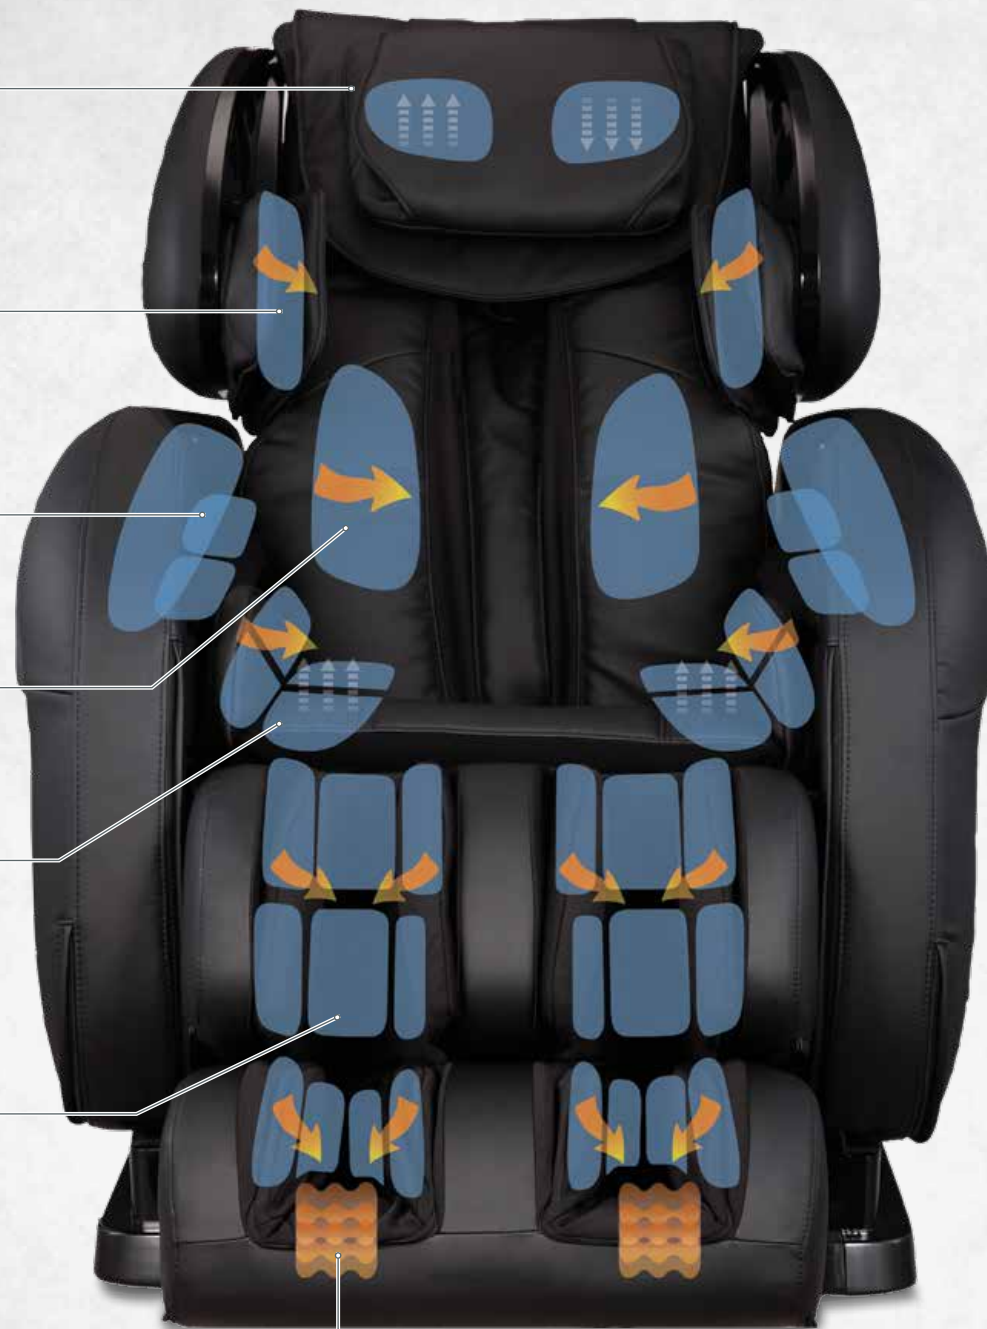

Leg Airbag Massage

Each leg of the massage chair features 12 individual airbags that provide a gentle squeezing and kneading massage which reduces tension and stress throughout the muscles. The deep tissue massagers will increase blood circulation to the feet, making you feel healthier and revitalized.

Sole & Foot Massage

Because you normally hold tension, stress and fatigue in your feet, these powerful massagers will revive your entire being. In each foot unit of the massage chair, there are 8 airbags and 3 rolling sole massagers. Each foot system is designed specifically to squeeze, knead, roll and swing massage the sole, arch, heel and ankle.

3D Massage Technology

The SmartChair X3 includes the most advanced 3D massage technology on the market. This means:

- Five 3D Intensity Levels: The massage rollers can be reduced to practically nothing, or to a powerful deep tissue massage.
- Auto-extend Neck Feature: The 3D system includes a sensor to detect where the user's neck lies. This allows the rollers to extend further for a stronger neck massage.
- New 3D Auto Programs: Enjoy a pulsating release of tension with the Deep Shiatsu program, gentle relaxation with the Healthy Breath program, or a renewing stretch with the Massage Extend program.

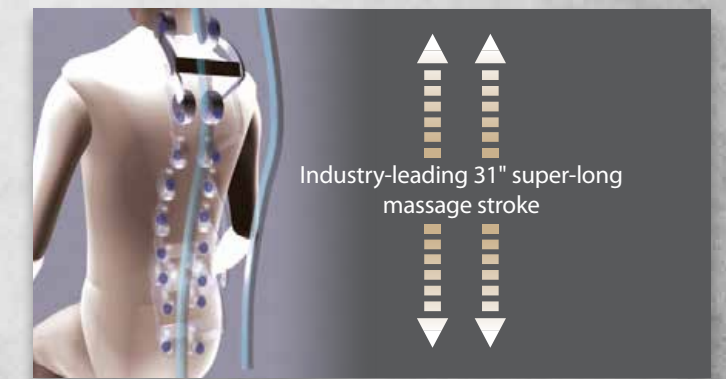

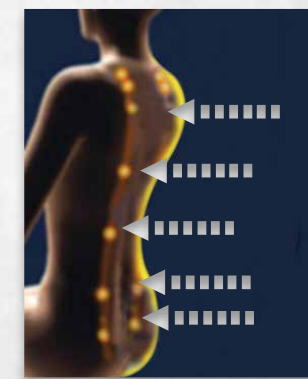

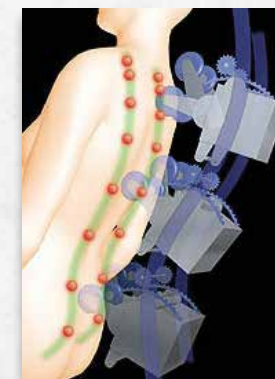

Lumbar Heat

Because the majority of your stress is trapped in the muscles of your back, the powerful heating function is designed to soothe and prepare your muscles for the massage. The heating modules gently warm up to gradually reduce pain and tightness, as well as restore healthy circulation and the rigidity of your muscles.

Chromotherapy

Chromotherapy is the use of light in the form of color to balance "energy" lacking from a person's body, whether it be on physical, emotional, spiritual, or mental levels.

Conforming to Your Body's Natural Shape

Your spine's natural "S" curve bears the brunt of everyday stress and tension that can lead to pain, numbness and an increased heart rate. The massage rollers follow a unique slide rail to conform to the natural shape of your spine to soothe stress, alleviate tension and provide long-lasting comfort.

Deep Pressure Massage Along the Spine

Vast bundles of nerves along the spine retain tension and cause stiffness and fatigue. Sink into deep relaxation with long, pressurized massage strokes from the cervical spine all the way through the lumbar region in long, continuous strokes. In just 20 minutes a day, you'll experience a new sense of well being.
